

CountIt

INVENTORY SOLUTION

Productivity Solutions for Small Businesses

Wasp CountIt™ is an automated solution that allows you to quickly and accurately verify inventory counts. Faster and easier inventory counts means spending less time counting inventory and more time controlling it. CountIt provides everything needed to eliminate the inefficiencies of a paper based system.

Wasp CountIt leverages barcode technology to count inventory and then automatically syncs with QuickBooks® or Microsoft Excel® to reduce the time spent performing physical counts, cycle counts, and monthly or year-end inventory counts. With CountIt, existing inventory data can be sent to the Wasp DT60 mobile computer. The DT60 mobile computer can then be used to quickly scan barcodes to count inventory items. After inventory is counted, Wasp CountIt transfers the new inventory data back to a PC, updating the existing inventory file and creating a variation report if needed.

CountIt is compatible with all Wasp mobile computers and gives you the ability to use multiple Windows Mobile or CE devices simultaneously to take counts and then transfers the new data from all devices into one file. If barcode labels are required, simply print from within CountIt to a Wasp barcode printer, such as the WPL305, WPL406, or WPL612 or print Avery 5160 labels via a laser printer. Easily print single adhesive labels, adhesive label sheets, and multiple copies of a label for an item in a single print job.

■ SYSTEM REQUIREMENTS

- ▶ Client Releases: Windows® 7, Windows Vista, or Windows XP (SP2)
- ▶ Windows Server: Windows Server 2008 or Windows Server 2003
- ▶ 200 MHz or faster processor
- ▶ 128 MB of RAM minimum
- ▶ 350 MB of available disk space
- ▶ 256 color minimum
- ▶ CD-ROM drive (Installation only)

■ WASP COUNTIT COMMON USES

- ▶ Retail inventory reconciliation and counts
- ▶ Manufacturing or warehouse physical inventory counting
- ▶ Daily, weekly, monthly, and year-end inventory count verification

CountIt

INVENTORY SOLUTION

Productivity Solutions for Small Businesses

FEATURES

- ▶ Seamless connection between your PC and the Wasp DT60 mobile computer
- ▶ Data import wizard walks you through the process of collecting data from an inventory application such as QuickBooks or Microsoft Excel
- ▶ Intuitive interface allows you to see any items that were counted, uncounted, discrepancies, or double counted
- ▶ Easily accept or reject any individual item count and update only accurate information
- ▶ Quickly and accurately count items and know what you have on-hand using a Windows Mobile or CE device
- ▶ Conveniently change mobile computer settings directly from the software
- ▶ Compatible with all Wasp mobile computers
- ▶ Import any text, .csv, QuickBooks, or Microsoft Excel file
- ▶ Access to reporting function shows all inventory issues and data
- ▶ Build your own custom reports using the versatile data grids
- ▶ Print single adhesive labels, adhesive label sheets, and multiple copies of a label for an item in a single print job using a Wasp or laser printer
- ▶ Supports QuickBooks 2002 or later
- ▶ Count inventory into locations using QuickBooks 2012 Enterprise Advanced Inventory Module
- ▶ Compatible with QuickBooks Pro/Premier/Enterprise US, QuickBooks UK, and QuickBooks Canada

BENEFITS

- ▶ Spend less time counting inventory and more time controlling it
- ▶ Eliminate the inefficiencies associated with using a manual paper based system
- ▶ Reduce the time it takes to count and accurately maintain inventory counts
- ▶ Reconcile inventory and eliminate human error by using a mobile computer
- ▶ Maintain accurate on-hand inventory levels
- ▶ QuickBooks compatible software program
- ▶ Eliminate wasted time manually re-entering correct inventory levels into QuickBooks or Microsoft Excel
- ▶ Easily print barcode labels for inventory items, speeding up the count process
